Domino 2023: What to Expect

In 1989....

- The Berlin Wall came down...

- The World Wide Web was invented...

- Air France started flying the Airbus A320...

- The Dalai Lama won the Nobel Peace Prize...

- Madonna released her 'Like A Prayer' album...

- The first 24 GPS satellites were put into orbit...

- Notes v1 was shipped...

The World is **Still** Powered by Domino

LG

40,000 users on HCL Notes & Domino for email and is expanding globally across all subsidiaries.

RoyalCaribbean INTERNATIONAL

Domino Apps ensure equipment safety regulations for millions of passengers

Vanguard

Domino apps help deliver a full array of low-cost mutual fund options to its 30 million investors.

dun & bradstreet

Domino processes critical business functions and manage data and workflows for customer files for more than 20 years

The World is **Still** Powered by Domino

HCL Domino Can Make a Difference in Your Bottom Line

HCL Domino "Danube" –17th Nov 2022

Better-Looking Apps

Domino Restyle - make your existing apps' UI look more modern

Apply themes or update colors - in a single Domino application or many at once

Enhanced Mail Security

ICAP support – enables server-based Antivirus protection

DKIM Inbound - ensures emails are not altered in transit between the sending and recipient server

Sender Policy Framework - provides protection against email spoofing used in phishing and spam

Easy Meeting Scheduling

Save time – find when co-workers on Domino, Exchange, and M365 are free to meet

Co-existence – helps with the transition of customer mail solutions to Domino; also helps organizations through mergers and acquisitions

Note: Subject to change without notice.

Notes was ...

- .... Salesforce before Salesforce.

- It was Dropbox before Dropbox.

- It was SharePoint before SharePoint.

- It was Atlassian before Atlassian.

- It was Zendesk before Zendesk.

- It was ServiceNow before ServiceNow.

- It was Workday before Workday.

- In some implementations, it was even GitHub before GitHub.

ZDNET

The Current Domino Customer Landscape

Customers tend to sit in 1 of 3 segments
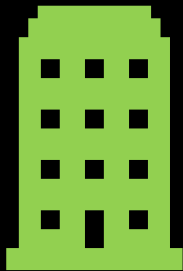

"Lovers"	**"Campers"**	**"Leavers"**
• Active Domino App Dev • Applications modernized • Upgrading to V11/12 • In-house expertise • Using secure Domino Mail	• Minimal new app dev • No need investment in UX • Likely running R8/9/10 • Moving apps away • Expertise retiring • Using MSFT for Mail	• Maintenance mode • Likely running R8.5/R9 • Actively decommissioning • Only complex apps left • No familiarity with Domino • Minimal to no expertise
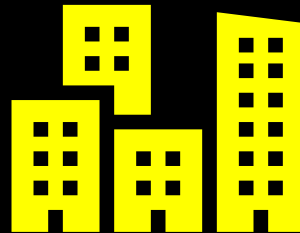

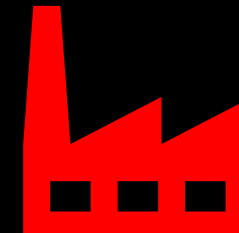

Macro CIO Challenges

- **Accelerate digital innovation with less resources**

- **Consolidate the number of app dev platforms**

- **Minimize risk from existing infrastructure & move to Cloud faster**

- **Expensive and risky app re-platforming – use COTS**

- **Hiring skilled resources**

- **Continued security, data privacy and compliance**

Why do Domino app re-platforming projects get stuck?

... for all customer segments !

Customers Get Stuck Here:
- Eroding Business Case to Replatform
- Increased Costs
- Functionality mapping challenges

Cost

Low Hanging Fruit
- Like for Like Migration
- OOTB Templates
- Automated Tools
  (Quest / NPMS / AvePoint)

Capability-Based Re-platforming (Easy)
- Rewrite
- COTS (ServiceNow, Salesforce, O365)

Capability-Based Re-platforming (Hard)
- Critical Apps / Cost Prohibitive

Domino Application Quantity (vertical axis)

Time to Execute (horizontal axis)

Why do Domino app re-platforming projects get stuck?

Volt MX Go Roadmap – Step #1

Vienna

AVAILABLE NOW

- Volt MX Go package
- Quick start services

**Build your first MX app**

✓ Proof of Concept
✓ Demo
✓ Or deploy in production

- Learn the MX product and gain new skills - mobile, web & more

- Either:
  - Start from an existing Notes app to add MX interface
  - Create native iOS/Android app with Domino REST API
  - Create something entirely new with or without an NSF
 - Or do it all
